CMS: WordPress

Platforms: Windows, Git/Github, Twitter API, Spotify API, Google Sheets, Google Suite, Microsoft Suite, WordPress

APPLICATIONS

Phree-OS | https://phree-os.herokuapp.com/

- Is a POS application developed to be used by anyone with a pop-up shop, farmer's market, food trucks, lemonade, etc...
- Created the login page, store page, and manager pages. Managing and creating API calls, calculations, and interactions with the user. Also, created the full-stack template for the team to use.
- Technologies used: MySQL, HTML 5, CSS 3, jQuery, Heroku, React, NPM Passport.

Steals for Deals | https://stark-ravine-73218.herokuapp.com/

- Is an application that is solely user-generated. If you come across certain foods or drinks that are great for the price, this app would help you share this serendipity with your fellow citizens.
- Created the user input DB, work with WebRTC, and fill in wherever the team needed help.
- Technologies used: MySQL, HTML 5, CSS 3, jQuery, Heroku, Yelp API, Node, NPM: Express, Multer, Express-Handlebars.

Shout! | https://lopez42512.github.io/Shout/

- Meet up at the click of a button with a friend. Give a shout and see if your friends are in the area to do some activities.
- Created a full implementation of shout logic, integrating both google maps and yelp API to the website, logo design, and messaging interface.
- Technologies used: Firebase, Javascript, HTML, CSS, jQuery

EXPERIENCE

Freelance DSM Biomedical (Exton, PA)

January 17' - present

- Created modular HTML/CSS email for the company to use for promotional services.
- Cut, edit, color grade, and create motion graphics for web promotional videos of company execs.

Neutronics Inc. (Exton, PA)

February 13' - January 19'

Engineering Assistant

- Tested a beta unit by running it through 13 different refrigerant gases to see if contaminated with air or other refrigerants. This work also required the refilling of tanks by mixing refrigerants.
- Provided IT support in installing/reinstalling software, wiping computers and initializing them.

Marketing (promoted August 13')

- Promoted to designing and redesigning of product data sheets, manuals, company brochures, product photography, designing four websites utilizing WordPress, and overall creative needs for the company. Software used: Photoshop, Illustrator, After Effects, and Premiere. Camera: Alpha SLT-A55V Artwork available upon request.
- Later provided the same works but remotely.

Lockheed Martin (Mount Laurel, NJ)

October 09'- September 11'

3D Artist

• Used 3DS Max to create scenes, animations, UIs, UX, and art assets to be implemented in a web training simulation.

Fusion Animation Studios
